

Rochester Electronics Manufactured Components

Rochester branded components are manufactured using either die/wafers purchased from the original suppliers or Rochester wafers recreated from the original IP. All recreations are done with the approval of the OCM.

Parts are tested using original factory test programs or Rochester developed test solutions to guarantee product meets or exceed the OCM data sheet.

Quality Overview

- ISO-9001
 - AS9120 certification
 - Qualified Manufacturers List (QML) MIL-PRF-35835
 - Class Q Military
 - Class V Space Level
 - Qualified Suppliers List of Distributors (QSLD)
- Rochester is a critical supplier to DLA and meets all industry and DLA standards.

Rochester Electronics, LLC is committed to supplying products that satisfy customer expectations for quality and are equal to those originally supplied by industry manufacturers.

The original manufacturer's datasheet accompanying this document reflects the performance and specifications of the Rochester manufactured version of this device. Rochester Electronics guarantees the performance of its semiconductor products to the original OEM specifications. 'Typical' values are for reference purposes only. Certain minimum or maximum ratings may be based on product characterization, design, simulation, or sample testing.

SN54F151A, SN74F151A 1 OF 8 DATA SELECTORS/MULTIPLEXERS

D2932, MARCH 1987—REVISED JANUARY 1989

- 8-Line to 1-Line Multiplexers can Perform as:
 - Boolean Function Generators
 - Parallel-to-Serial Converters
 - Data Source Selectors
- Package Options Include Plastic "Small Outline" Packages, Ceramic Chip Carriers, and Standard Plastic and Ceramic 300-mil DIPs
- Dependable Texas Instruments Quality Reliability

description

These monolithic data selectors/multiplexers provide full binary decoding to select one of eight data sources. The strobe input (\bar{G}) must be at a low logic level to enable the inputs. A high level at the strobe terminal forces the W output high and the Y output low.

The SN54F151A is characterized for operation over the full military temperature range of -55°C to 125°C . The SN74F151A is characterized for operation from 0°C to 70°C .
