DESCRIPTION

ADC84, ADC85H, and ADC87H analog-to-digital converters utilize state-of-the-art IC and laser-trimmed thin-film components, and are packaged in a 32-pin hermetic side-brazed package.

They are complete with internal reference and input buffer amplifier. Thin-film internal scaling resistors are provided for the selection of analog input signal ranges of $\pm 2.5V$, $\pm 5V$, $\pm 10V$, 0 to $+5V$, or 0 to $+10V$. Gain and offset errors may be externally trimmed to zero, offering initial accuracies of better than $\pm 0.012\%$ ($\pm 1/2LSB$).

The fast 10 μ s conversion speed for 12-bit resolution makes these ADCs excellent for a wide range of applications where system throughput sampling rates of 100kHz are required. In addition, they may be short cycled and the clock rate control may be used to obtain faster conversion speeds at lower resolutions.

Data is available in parallel and serial form with corresponding clock and status signals. All digital input and output signals are CMOS/TTL-compatible. Power supply voltages are $\pm 12VDC$ or $\pm 15VDC$ and $+5VDC$.

ELECTROSTATIC DISCHARGE SENSITIVITY

This integrated circuit can be damaged by ESD. Burr-Brown recommends that all integrated circuits be handled with appropriate precautions. Failure to observe proper handling and installation procedures can cause damage.

ESD damage can range from subtle performance degradation to complete device failure. Precision integrated circuits may be more susceptible to damage because very small parametric changes could cause the device not to meet its published specifications.

The information provided herein is believed to be reliable; however, BURR-BROWN assumes no responsibility for inaccuracies or omissions. BURR-BROWN assumes no responsibility for the use of this information, and all use of such information shall be entirely at the user's own risk. Prices and specifications are subject to change without notice. No patent rights or licenses to any of the circuits described herein are implied or granted to any third party.
