

T-1, (3-mm) Round, Triple PCB Mount LED Indicator, J191B and J192B Series

J191B and J192B form a family of indicator arrays with identical spacing but with different reach and can be CMOS driven to save components. The three lamps are positioned on a 0.4" pitch. The low profile makes them ideal for applications where space is a premium, such as in card racks that are closely positioned.

Specify part desired as follows:

J191B/Order Code LED1 + Order Code LED 2 + Order Code LED 3

For example: "J191B/I+Y+G" designates an assembly with a red LED, a yellow LED and a green LED from left to right.
